

1H Profits nicely ahead of 4Y AVG progress ratios

Margins rising on increase in successor contracts and guarantee fees

SUMMARY

- ★ TENPO INNOVATION announced 1H FY23/3 results at 15:30 on Wednesday 11/2, and held an online briefing from 16:00 on Monday 11/14. Results briefing materials provide YOY comparisons as reference values since the Company began preparing consolidated accounts from the 1Q of this FY following the establishment of wholly owned subsidiary Tenpo Safety Inc. on April 1. Headline numbers were: net sales +7.7% YoY, gross profit +16.8%, OP +25.6% and profit ATOP +25.4%. GPM improved from 17.6% → 19.1%, and OPM improved from 7.8% → 9.1%. 1H progress ratios were net sales 48.2%, OP 52.4% and profit ATOP 54.4%, versus 4-year averages of 48.4%, 45.4% and 45.2%, respectively.
- The important takeaways from 1H results are: 1 the difficult environment for the restaurant industry overall is actually a favorable opportunity for the Company as more properties become available to procure for subleasing, and turnover in existing contracts increases the number of profitable successor contracts (no acquisition costs such as key money), and 2 newly established store rent guarantee business has no cost of sales or operating expenses such as personnel cost, so net sales are basically equivalent to operating profit (nearly 100% OPM), and revenue is linked directly to the number of signed contracts each quarter, so profits are set to grow at a faster pace than net sales going forward thanks to these two structural drivers boosting margins.
- Over the last 2½ years the share price has underperformed TOPIX by roughly 14%, mainly due to association with the struggling restaurant industry under the COVID-19 pandemic, despite TENPO INNOVATION's subleased store properties being <u>uncorrelated</u> to the trend of overall number of stores in JF data. Accelerating profit growth is making cheap valuations stand out further, with potential rising for a full-year overshoot.

PART ① RESTAURANT INDUSTRY UPDATE

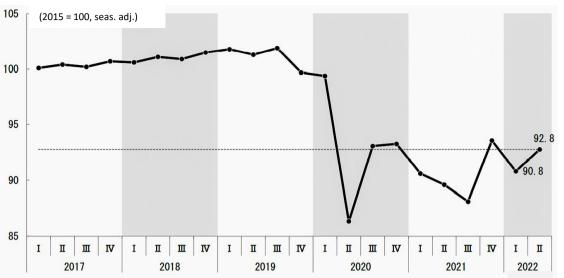

Link (Japanese-only) to METI FBI semi-annual analysis reports: https://www.meti.go.jp/statistics /toppage/report/minikeizairesult-fbi.html

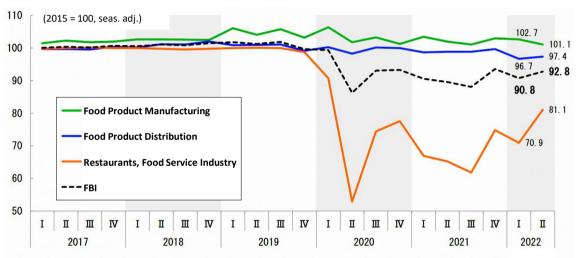

For macro-level data, we have found METI's semiannual (May/Oct) Trends in Food and Beverage **Related Industries** provides the most useful top-down approach, which gives a handy snapshot overview of current trends in food service-related industries. The advantage of this index-based approach is that it provides an accurate picture of the trend level of an historical time series without suffering from the shortcomings of the base effect inherent in YoY statistical analysis.

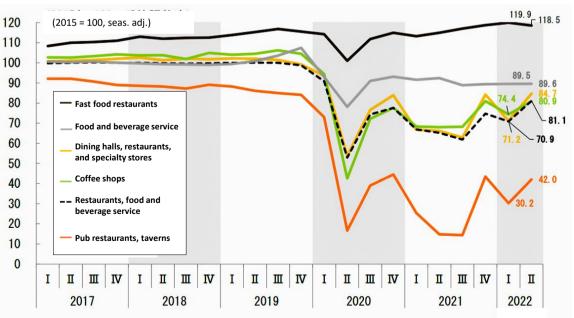

2022 1H METI Food Business Index (FBI) Quarterly Trend (seasonally adjusted)

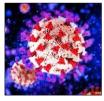

FBI Quarterly Breakdown of Component Industries (seasonally adjusted)

JF Food Service Industry Market YoY Trend Survey – Monthly Results Reports

JF Food Service Industry Market Monthly Trend Survey – adjusted vs. 2019 same month*

Source: Japan Foodservice Association (JF). Note: data for all stores incl. new opens. http://www.ifnet.or.jp/data/data_c.html

Net store closures of restaurants in the **allstores** data on the right is clearly a lagging indicator relative to sales. The middle graph on the right suggests the impact from the global pandemic *appears* to be mitigating. However, YoY figures, by definition, are versus the same month in the previous year, which can be deceptive after large declines.

In order to strip out the base level effect, from Mar-2021, the JF monthly survey results report added two new columns to include sales and no. of stores comparisons versus the corresponding month in 2019 (see lower graph on the right). 

Expertise in finding and subleasing relatively small, low rent, vacatedfurnished restaurant store properties, many in central Tokyo.

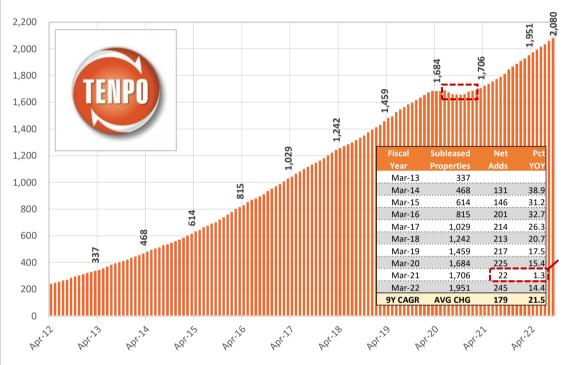

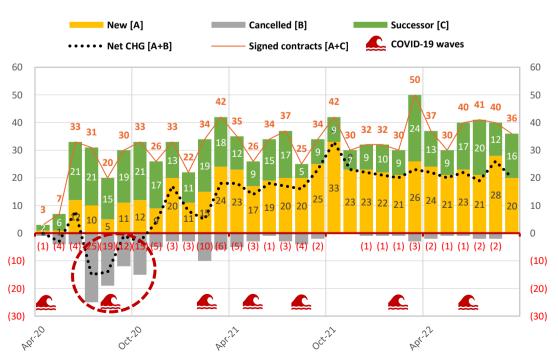

TENPO INNOVATION subleased store properties are <u>uncorrelated</u> with the market According to the JF Food Service Industry Market YoY Trend Survey for September 2022, total stores declined -0.8% YoY, but relative to September 2019, declined -7.0%, yet to post a meaningful recovery. For the same period, subleased restaurant store properties for TENPO INNOVATION increased +14.8% YoY, and relative to June 2019, increased +31.3%. In other words, there is no correlation between TENPO INNOVATION subleased restaurant store properties and the underlying market trend for total stores. They are <u>uncorrelated</u>. The graph below shows the long-term monthly trend of the Company's subleased restaurant store properties.

Monthly trend of subleased store properties: textbook definition of stable high growth

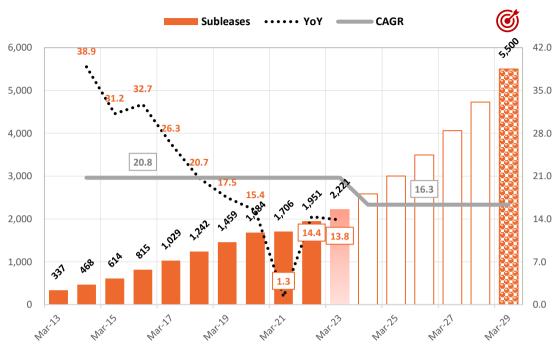

Monthly trend of sublease contract transactions during the pandemic

Source: compiled by Omega Investment from company IR results briefing materials.

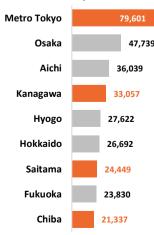

TENPO INNOVATION: Sustainable double-digit growth with high stability

Source: compiled by Omega Investment from company IR FY22/3 Q4 results briefing materials.

The graph above shows the Company's medium-term target for 5,500 subleased properties by the end of FY3/29, implying 6-year CAGR of +16.3% per year. This target was not randomly formulated by simply assigning a certain CAGR growth rate, rather, it is equivalent to a roughly 5% market share of the estimated 110,000 viable candidate restaurant store property universe in Tokyo and the three surrounding prefectures, based on the total number of 160,000 restaurants from the 2016 Economic Census of Business Activity. In order to achieve this target, a key initiative in the Company's Medium-Term Management Plan is to boost its salesforce from the current 40 professionals (14 store procurement, 26 finding subleasing tenants) to 100 (30 store procurement, 70 finding subleasing tenants). Please refer to P10 in the REFERENCE section for details of initiatives in the MTP.

PART (2) EARNINGS RESULTS

FY23/3 H1 profits are running nicely ahead of 4Y AVG progress ratios

2Q results are summarized in the table below. The number of signed contracts topped 100 for the fourth consecutive quarter at 117 (new record), and the number of profitable successor contracts also increased to 48. Total active restaurant store sublease properties topped reached 2,080 (+14.8% YoY). The Company characterized the current business environment as extremely favorable to its business model given active turnover in restaurant openings and closings. As described in our Initiation Report dated June 13, TENPO INNOVATION specializes in relatively small properties having 1) cheap rent, 2) good location and 3) vacated furnished, and as such, are always in high demand.

The key takeaway from the graph below showing the quarterly trend of sales by income category is that running income has resumed double-digit growth after a brief lull on the outbreak of COVID-19. While the quarterly sales amount for RE sales fluctuates from quarter to quarter, it is achieving its target of one property sale and one procurement each quarter (2Q-end inventory 3 properties). While the main objective of this business is to maintain a good relationship with RE brokers by paying meaningful commissions in return for good information on sublease candidates, the Company has recently also received interest from existing owner landlords to purchase properties, enhancing a stable supply pipeline without referrals. We summarize new store rent guarantee business in Part 3.

Quarterly Trend of Sales Breakdown by Income Category (JPY mn)

Note: initial income includes one-time payments of key money, contract-related fees and proceeds from the sale of fixtures from vacated-furnished store properties. Running income includes rent income and contract renewal fees from sublease tenants. Store sublease rent guarantees include some running income. Figures for 1Q FY23/3 are consolidated; figures for 4Q FY22/3 and earlier are non-consolidated. Source: excerpt from IR results briefing materials.

Store rent guarantee business of Tenpo Safety Inc. commenced on April 1

Since the Revised Civil Code went into effect from April 2020, rent guarantees for store lease properties are expanding socially as a system that benefits both property landlords and tenants. In the past, the Company had tenants enter a rent guarantee contract automatically upon application, and the business was consigned to outside providers of rent guarantees. However, with over 17 years experience in subleasing over 2,000 restaurant store properties, and unique screening know-how, the Company is fully capable of assessing the risk of its subleased properties. The Board of Directors resolved on March 24 to establish a wholly-owned subsidiary with the aim of keeping this income stream in-house.

According to the Company, every contract signed requires entering a rent guarantee agreement, and the rent guarantee fee is equivalent to roughly 1 month's rent. The newly established Tenpo Safety Inc. handles 70-80% of these contracts, the remainder deemed to carry a higher level of risk are outsourced. Therefore, with signed contracts running at over 100 per quarter, roughly 80 contribute directly to Group profits each quarter. As described on the cover page, this business carries a virtual 100% OPM, and growth is linked directly to signed contracts. Along with the rise in profitable successor contracts, store rent guarantee business will be a structural driver of margins going forward.

Tenpo Safety Inc. Store Rent Guarantee Business Overview

PART ④ SHARE PRICE

Key takeaways:

• The current P/E is trading on a 5% discount and EV/EBITDA is trading on an 11% discount, each to their respective historical averages. Based on H1 progress ratios for OP and profit ATOP, earnings may overshoot initial guidance, expanding the real discount.

The equity ratio on the surface may appear low at 28.2%, however this reflects the fact that the B/S is comprised of a large amount of deposits paid and received. The Company is debt-free, and the B/S is extremely healthy.

• The company does not disclose initial guidance for the annual dividend, so the lower graph assumes the same dividend as last term of ¥12.00 per share.

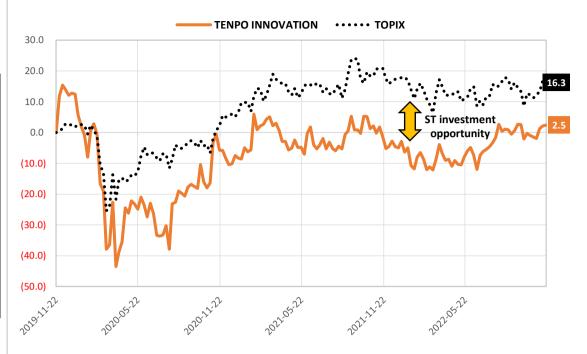

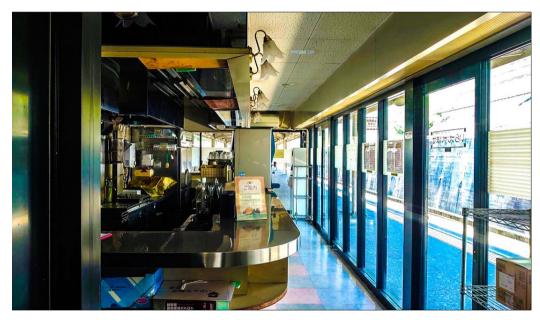

3Y Share Price Chart and Trend of Valuations

3Y Relative Share Price Performance

✦The share price has underperformed TOPIX by 14% over the last 2½ years, largely due to association with the struggling restaurant industry under COVID-19. Not only has the Company resumed double-digit growth in net sales, growth in profits is accelerating due to the structural drivers of rising successor contracts and the new addition of extremely high margin rent guarantee business.

Priority initiative to strengthen and enhance the sales force

The Company has the following medium-term and long-term targets. By FY3/25, increase the Sales Dept. from 40 professionals to 100 (currently 14 in charge of

property procurement \rightarrow 30, 26 in charge of finding tenants \rightarrow 70)

- Subleased store property net adds to 600 per year (by FY3/26)
- Contracts signed to 1,000 per year (by FY3/27)

By FY3/29, increase the number of active subleased store properties to 5,500

- Net sales ¥30 billion
- Operating profit ¥3 billion
- OPM 10.0%

As TENPO INNOVATION is the only specialist firm engaged in this restaurant store property subleasing business, this is no easy task, and cannot be accomplished by simply directing a headhunting firm to find the required personnel (they simply do not exist). Management fully recognizes that the way forward is to find suitable personnel and provide advanced level on-the-job training by existing professional staff. The point is that there is a lot of technical background knowledge required about property specifications such as the correct amperage requirements for electricity supply, drainage pipe diameter, etc., as well as expertise and know-how in retail properties, the restaurant industry, the city, restaurant facilities, and legal matters.

The Company summarizes its HR strategy for the Sales Dept. in a 3-point plan: (1) increase staff, (2) provide advanced OTJ training and (3) transfer capable sales staff to property procurement. Management envisions this extensive training for sales staff to procure properties to lease for the purpose of subleasing will take one year. Specifically, it will try to develop a standard method of passing on the expert knowledge involving the 237 items/steps from introduction of the property to concluding a subleasing agreement. Then, recognizing that procurement has a high level of difficulty and strategically holds the highest importance to future growth, it will optimize transfer and assignment of capable sales staff.

Then, in order to achieve the second long-term goal above of increasing the number of active subleased store properties to 5,500 by FY3/29, management will employ a strategy of (4) procurement area focus. Specifically, roughly 30 procurement staff will cover approximately 1,000 station areas and 2,000 real estate agents. For terminal stations with more than 1 million passengers and major real estate agencies, multiple procurement staff will be assigned. The target is to achieve procuring roughly 600 store properties per year (or 50 per month) by FY3/26.

Shareholder Return Policy

The Company's basic policy is to pay stable dividends while strengthening its management base. The dividend per share (DPS) for the fiscal year ending March 31, 2023 is currently undecided, to be disclosed as soon as it becomes available.
